**Report Overview:** This publication on the Status of Women in McMinn County is part of a statewide publication of the Tennessee Economic Council on Women, *The Status of Women in Tennessee Counties, 2004*. The Economic Council on Women is a State agency created under TCA § 4-50-100, et seq. by the One Hundredth General Assembly in 1998 to address the economic needs of Tennessee women.

## The Status of Women in Tennessee Counties

### McMINN

Women have taken remarkable strides towards economic equality, from education to earnings to political participation. Women are now pursuing goals such as business ownership, leadership roles in their careers, and election to state and federal political office. However, obstacles still exist in the climb toward equality. Nationwide, equal numbers of men and women are obtaining four-year college degrees; however, these gains have not translated into pay equity. The average college-educated woman working full time earns \$44,200 a year compared to \$61,800 for men in the same category. Women are still under-represented in many of the highest paying, fastest growing sectors of the economy. Helping women break into these traditionally male-dominated areas like computer science, engineering, mathematics and technology, as well as all skilled-labor positions, gives women tools for self-sufficiency and understanding of their personal capabilities, and these advances are good for the economy of our counties and of our state.

#### Employment and Earnings

The employment and earnings index includes data on women's annual earnings, the earnings gender gap, female labor force participation rate, the female unemployment rate, and the percent of women in managerial or professional occupations.

- ◇ Women in McMinn County have median annual earnings of \$20,524 while their male counterparts have median earnings of \$31,051.
- ◇ McMinn County is among the bottom ten counties in wage equity, with women earning just 66.1% of the earnings of men in the county.
- ◇ 41.1% of women in McMinn County participate in the labor force and they represent 44.9% of the county's work force.
- ◇ The current female unemployment rate in McMinn County is 6.1% while the overall county unemployment rate is 5.3%.
- ◇ Among all working individuals in the county, 21.8% have jobs in managerial or professional fields, but when only female employees are considered, that number increases significantly to 28.7%.

#### Economic Autonomy

The economic autonomy index includes information on educational attainment, business ownership and general quality of life issues.

- ◇ 70.5% of women in McMinn County have a high school diploma while 69.3% of all county residents have a high-school level degree.
- ◇ 10.8% of all county residents have a four-year college degree and 10.1% of women in the county have at least a bachelor's degree. About the same percentages of men and women have high school and bachelor's degrees.
- ◇ Though 10.9% of families live in poverty in McMinn County, 32.0% of families with a female householder and no husband present live at or below the poverty line.
- ◇ The county ranks in the top 25 counties in percentage of women-owned businesses (28.9%) and percentage of women with any kind of health insurance coverage (94.3%).
- ◇ Despite making up almost 30 percent of privately-owned businesses in McMinn County, women-owned businesses only account for 4.0% of the total sales and receipts of private firms in the county.

# ABOUT THE COUNCIL AND THIS REPORT

McMinn County

*The Status of Women in Tennessee Counties* report offers an economic profile of women in each county of Tennessee and examines how women's rights and equality vary among the counties. The report presents data and overall rankings in two categories of women's economic status: employment and earnings and economic autonomy. Indicators of women's status in each category make up the composite rankings of the counties.

The employment and earnings section presents data on women's annual earnings, the earnings gender gap, female labor force participation rate, the female unemployment rate, and the percentage of women in managerial occupations.

The economic autonomy section includes information on the percentage of businesses owned by women, educational attainment levels, percentage of households headed by a single female, single female headed households living in poverty, percentage of women with health insurance, the high school dropout rate and the teen pregnancy rate.

The **Tennessee Economic Council on Women** was created in 1998 by the Tennessee General Assembly to assess Tennessee women's economic status. The Council develops and advocates solutions to address women's needs in order to help women achieve economic autonomy. In setting its priorities, the Council selects issues that are timely and likely to result in positive changes for women.
